About the development

THE EV BATTERY PLANT BEING BUILT IN KOKOMO. (PHOTO BY KENT NISHIMURA)

StarPlus Energy is making a \$2.5B investment in Kokomo

Kokomo will be the site of Stellantis’ and Samsung SDI’s first North American electric vehicle battery manufacturing plant.

The first plant of its kind in Indiana, the multimillion-square-foot facility will further cement Kokomo as one of the top auto manufacturing cities in the nation as the auto industry moves toward an electric future.

Through a joint venture called StarPlus Energy, Stellantis and Samsung SDI are investing more than \$2.5 billion to construct the

Industrial Park a success

It is being built on land secured for an industrial park by the Greater Kokomo Alliance in partnership with the City of Kokomo and Howard County.

lithium-ion battery production plant in Kokomo and will create 1,400 new jobs.

The new facility will supply battery modules for various vehicles produced at Stellantis’ North American assembly plants.

It will support Stellantis’ new strategic plan, Dare Forward 2030.
